

ROYCE RODRIGUES

+91 9356882049 | roycerodrigues2008@gmail.com | [LinkedIn](#) | [GitHub](#) | Mumbai

Summary

I enjoy hands-on learning through dismantling systems, analyzing their components, and gaining practical knowledge beyond theory. I am experienced with Arduino-based projects and circuit simulations using Tinkercad, developing an interest in hardware, programming, and prototyping. And always eager to collaborate, learn new technologies, and contribute actively to the ACM community through technical initiatives and projects.

Education

B.Tech. in Computer Engineering
Dwarkadas J. Sanghvi College of Engineering
Second Year | CGPA: 8.2/10
MHT CET: 99.42%ile
HSC: 78%
SSC: 94.20%

Technical Skills

Programming: C (Beginner), C++ (Beginner), Python (Proficient), Java (Proficient)
Tools: Git, GitHub, Linux (Ubuntu and Kali), Blender, VirtualBox, Tinkercad, Autocad, VS Code, Godot
Web Technologies: HTML, CSS, JavaScript
Database: DBMS (Learning), SQL (Learning)

Projects

Virtual Cyber Attack and Defence Simulation:

Technologies: Oracle VirtualBox, Kali Linux, Ubuntu server (CLI only)

Description: This is a solo project I built to learn and test my knowledge on Networking and Cybersecurity. I learnt how poor design practices compromises security of applications and how attackers exploit those vulnerabilities effectively.

Automated File Password Cracking:

Technologies: Python (zipfile, pypdf)

Description: A password protected zip/pdf is bruteforced using python and a list of commonly used passwords. This python script reads password from the common passwords file and tries it on the target zip/pdf until the matching password is found which is then saved and displayed.

Certifications ([Verify](#))

- IBM - AI Fundamentals
- Datacom - Software Development Job Simulation
- Goldman Sachs - Risk Job Simulation
- Cisco - Introduction to Cybersecurity
- Deloitte Australia - Cyber Job Simulation
- Tata - Cybersecurity Analyst Job Simulation
- AIG - Shields Up: Cybersecurity Job Simulation
- Mastercard - Cybersecurity Job Simulation

Technical Activities

- Attended the 2-Day DJSCE IEEE – KiCad PCB Design Workshop
- Registered volunteer of the NSS
