

Info-Tech

Task 1: Portfolio Website

Build a simple Personal Portfolio Website using HTML, CSS and JavaScript.

The primary goal of this task is to showcase your front-end development skills by creating a comprehensive personal profile online.

Your website should include:

- About Me
- Education
- Skills
- Projects
- Contact Information

Note:

- Clean and neat design
- Easy navigation

Task 2: DJSCE ACM Website

Imagine you have been asked to design the DJSCE ACM Student Chapter website.

This objective focuses on UI/UX redesign principles to improve the digital presence and user engagement for the student chapter.

Your submission should include:

Homepage Design

Create a simple homepage that includes sections such as:

- Home
- About ACM
- Events
- Team
- Contact Us

Task 3: Theme Ideas

Suggest 2–3 themes for the website.

You may create your design using HTML/CSS, Figma, Canva, or any design tool of your choice.

Brownie Points

- Deploy your website using GitHub Pages, Netlify or Vercel
- Add simple animations or hover effects
- Use a creative colour palette
- Make a prototype for the ACM homepage.

Submission Guidelines

Please submit:

- GitHub Repository Link
- Hosted Website Link (if deployed)
- Screenshots of your work

Please carry your laptop to display your work at the time of interviews.
